

The Fundamental Higher Consciousness Premise

The audited consolidation of the corpus at eleven parties: the DeepSeek main line completed through its three snapshots and culminating in the non-dual position; the fifth edition turned under the auditor's eye and corrected in three places; the differentiation program's anchors carried at their honest grades — every claim status-tagged, every count derived from a stated unit, every search protocol recorded.

Audit and Consolidation, Sixth Edition · Z.ai

Sources: the 130-turn GLM dialogue (11,088 lines), the Qwen conversations (three shares, 60 + 66 + 256 messages), the DeepSeek main line in three snapshots (53 + 88 + 106 turns, one conversation, subsequence-proven), the DeepSeek file exchange (3 turns), the embedded audit, the consolidation treatise, the audit lineage of both lines, the external Claude audit, the two exported critique files, and the empirical source set (Santander 2025; Modesti 2022; Schlumpf 2013; Reinders 2019; Farnes 2020 with the Reynante toolkit)

Method: line-level adversarial review, citation verification with recorded search protocols, arc-test, adjudication, the elevation protocol, and the reflexive audit
